

COMMUNITY INVOLVEMENT PLAN

**FALCON REFINERY SUPERFUND SITE
INGLESIDE, SAN PATRICIO COUNTY, TEXAS**

AUGUST 2004

**U. S. ENVIRONMENTAL PROTECTION AGENCY
REGION 6**

THE U. S. ENVIRONMENTAL PROTECTION AGENCY'S
SUPERFUND COMMUNITY INVOLVEMENT PROGRAM IS COMMITTED
TO PROMOTING COMMUNICATION BETWEEN CITIZENS AND THE AGENCY.
ACTIVE PUBLIC INVOLVEMENT IS CRUCIAL TO THE SUCCESS OF ANY PUBLIC PROJECT.

COMMUNITY INVOLVEMENT ACTIVITIES AT THE
FALCON REFINERY SUPERFUND SITE
ARE DESIGNED TO:
INFORM THE PUBLIC OF THE NATURE OF THE ENVIRONMENTAL ISSUES ASSOCIATED WITH THE SITE,
INVOLVE THE PUBLIC IN THE DECISION-MAKING PROCESS THAT WILL AFFECT THEM,
INVOLVE THE PUBLIC IN THE RESPONSES UNDER CONSIDERATION TO REMEDY THESE ISSUES, AND
INFORM THE PUBLIC OF THE PROGRESS BEING MADE TO IMPLEMENT THE REMEDY.

**COMMUNITY INVOLVEMENT PLAN
FALCON REFINERY SUPERFUND SITE
INGLESIDE, SAN PATRICIO COUNTY, TEXAS
AUGUST 2004**

1.0 OVERVIEW OF THE COMMUNITY INVOLVEMENT PLAN

The U.S. Environmental Protection Agency (EPA) developed this Community Involvement Plan (CIP) to facilitate two-way communication between the community surrounding the Falcon Refinery Superfund Site (hereinafter “the Site,” a.k.a National Oil Recovery Corporation) and the EPA, and to encourage community involvement in Site activities. The EPA will utilize the community involvement activities outlined in this plan to ensure that residents are continuously informed and provided opportunities to be involved.

This CIP addresses the Site’s relationship to the community and the EPA (Section 2.0 - Site Description, Hazard Ranking System, and Enforcement History), provides a background of the community (Section 3.0 - Community Background), discusses the EPA’s community involvement program (Section 4.0 - EPA’s Community Involvement Program), presents “The Plan” (Section 5.0 - The Plan), and provides a listing of available resources (Appendices). The EPA drew upon several information sources to develop this CIP, including community interviews and Site files. The EPA’s Regional Office will oversee the implementation of the community involvement activities outlined in this CIP.

2.0 SITE DESCRIPTION, HAZARD RANKING SYSTEM, AND ENFORCEMENT HISTORY

This section of the CIP provides a description of the Site, and discusses the Hazard Ranking System and the enforcement history of the Site.

2.1 Description of the Site

The Site occupies approximately 104 acres and is located 1.7 miles southeast of State Highway 361 near the intersection of FM 2725 and Bishop Road near Ingleside, Texas (see Figure 1 - Site Aerial Photograph). Ingleside is located approximately 18 miles northeast of Corpus Christi, Texas. The Site lies approximately five feet above sea level. The Site consists of an abandoned refinery that has operated intermittently since 1980. When in operation, the refinery operated at 40,000 barrels per day capacity with primary products consisting of naphtha, jet fuel, kerosene, diesel, and fuel oil.

2.2 Hazard Ranking System

The Hazard Ranking System (HRS) is the principal mechanism that the EPA uses to place uncontrolled waste sites on the National Priorities List (NPL). The HRS is a model used to evaluate potential risks to public health and the environment from releases or threatened releases of hazardous substances. The EPA uses the HRS to calculate a site score based on the actual or potential release of hazardous substances from a site through the air, surface water, ground water, or soil media. This score is the primary factor used to decide if a hazardous waste site should be placed on the NPL. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with a release of hazardous substances.

In February 2002, the Texas Natural Resource Conservation Commission (now the Texas Commission on Environmental Quality), in cooperation with the EPA, prepared the “Hazard Ranking System Documentation Record” for the Site. The overall score for this Site determined that the Site could be placed on the NPL. The “Proposed Rule” proposing the Site to the NPL was published in the Federal Register on September 5, 2002. This Site has not been placed on the NPL and is currently being addressed as an “alternative site.” The EPA and the Potentially Responsible Party for the Site entered into an Administrative Order on Consent for a Remedial Investigation and Feasibility Study and a Removal Action (see Section 2.3 - Enforcement History) on June 9, 2004.

2.3 Enforcement History

The Superfund Enforcement Program seeks to maximize the involvement of Potentially Responsible Parties (PRPs) in the cleanup of Superfund sites. Statutes provide the EPA with the authority to order PRPs to investigate and clean up sites, negotiate settlements with PRPs to fund and/or perform site cleanups, and commence legal action if the PRPs do not perform and/or pay for cleanup. A primary goal of the enforcement program is to obtain consensual settlement or, if necessary, compel PRPs to implement site cleanups. The primary tool used to achieve this goal is the Administrative Order on Consent (AOC). When EPA takes response or enforcement action at a site, the enforcement program’s goal is to recover the costs of those actions from the PRPs. Once a PRP(s) has agreed to take response action at a site, the goal of the enforcement program is to ensure that the studies or cleanup activities are performed correctly and in accordance with the AOC and relevant EPA guidance.

The EPA issued General Notice Letters (GNLs) to the PRPs on September 27, 2002. The GNLs notified the PRPs of their potential liability that they may incur or may have incurred with respect to the Site. The GNLs also notified the PRPs of the potential response activities at the Site which they may be asked to perform or finance at a later date. The GNL requested a response within thirty (30) days of the PRP's receipt of the GNL to indicate their willingness to participate in future negotiations about the planned Remedial Investigation and Feasibility Study (RI/FS) currently being planned for the Site.

The EPA issued Special Notice Letters (SNLs) to several PRPs on May 28, 2003. The SNLs notified the PRPs that the EPA has determined that they may be liable for the cleanup of the Site. The SNLs also requested that the PRPs respond with a "good-faith offer," to perform the RI/FS, within sixty (60) days of their receipt of the letter.

The PRP for the Site entered into an "Administrative Order on Consent" with the EPA, on June 9, 2004, to perform and finance the RI/FS and Removal Action for the Site.

3.0 COMMUNITY BACKGROUND

This section of the CIP describes the community profile, the history of community involvement, the community's concerns, and the EPA's response to these concerns.

3.1 Community Profile

Ingleside, Texas, known as "The Gateway to the Islands," is located 18 miles north of Corpus Christi, Texas, in San Patricio County. The population of Ingleside is approximately 9,388, and the population of San Patricio County is approximately 68,334. Ingleside continues to be the fastest growing community in the county. Its unprecedented growth can be attributed to the U.S. Navy's choice of Ingleside as a home-port, industry expansions, the increased popularity of "ecotourism" such as the Great Texas Coastal Birding Trail, the growing retirement community, and people relocating to raise their families in a community with a leisurely pace and abundant nature/waterway resources. Additionally, approximately 6 million tourists visit the Coastal Bend each year. Peak tourist months are June and July; but, because of the sunny climate, visitors are present all year long.

San Patricio County covers 892 square miles, and according to recent Bureau of Census population estimates, the county is the second-fastest growing community in the Coastal Bend. Out of Texas' 254 counties, it ranks 43rd in terms of growth.

3.2 History of Community Involvement

Door-to-door community interviews were conducted by the EPA on October 15-16, 2002, to help identify the local community's concerns and their knowledge about the Site in order to determine what information was needed to keep them more informed. The EPA also met with the City Managers for Corpus Christi and Ingleside on October 15 and 16, 2002, respectively.

3.3 Community Concerns Determined During Community Interviews

Community members in the vicinity of the Site, who were interviewed, shared many concerns regarding the abandoned refinery and associated tanks. There were complaints from members of the community about foul smells from the refinery and tank area. They stated that the smells were often so strong that it is believed they were the cause of nausea and sometime stomach pain and illnesses. Aside from the mentioned effects from the smell, several community members had additional health concerns that they believed were Site-related. At least three sets of parents were concerned because they believed their children's frequent illnesses were Site-related.

Almost all of the community members interviewed raised concerns about water quality around the Site. Residents stated that some well water tasted like oil, some tasted bad but not specifically like oil, some had a yellowish color and smelled badly. Only one resident interviewed, who still used well water, did not have complaints about the quality of the water. Most residents in the area who depend on well water bought bottled water for drinking or were considering connecting to the city's water source.

Additional community concerns were about frequent leaks at the refinery, oil dripping out of tanks, and that the leaks were not properly cleaned up. Several community members cited instances in which oil from leaks at the Site was pumped into the wetland and residential area northeast of the site across Bishop Road. One resident in that area recounted one of these incidents when his front yard was covered in crude oil. Regarding upcoming cleanup activities, numerous community members were concerned about harmful vapors drifting from the Site and if actions would be taken to minimize vapors during these actions.

Community members were also concerned about the quality of the streams, wetlands, and wildlife habitat surrounding the Site. At least one resident interviewed was an avid hunter who no longer hunted in the area because he was specifically worried about the ducks and geese who depend on the habitat around the Site, and if those animals were safe to eat.

3.4 EPA's Response to Community Concerns

The EPA is planning several community meetings to discuss the Remedial Investigation and Feasibility Study and Removal Action for the Site. The EPA will be available to answer any questions about the Site and these actions.

4.0 EPA'S COMMUNITY INVOLVEMENT PROGRAM

The overall goal of the EPA's community involvement program is to promote two-way communication between citizens and the EPA, and to provide opportunities for meaningful and active involvement by the community in the Superfund process. The EPA will implement the community involvement activities described in Section 5.0 (The Plan). This plan is partly based on the results of the community interviews and meetings conducted in October 2002.

5.0 THE PLAN

The EPA will perform the following key activities during the implementation of "The Plan." Table 1 (Time Frame for Community Involvement Activities) outlines each of the community involvement activities discussed in this CIP.

5.1 Community Interviews and Meetings

The objective of the interviews and meetings is to determine the community's concerns and discuss the EPA's current and planned actions for the Site. Individual and group interviews and meetings with local community members, local officials, and interested groups will be held as appropriate during the course of the RI/FS and Removal Action for the Site. The timing of these interviews and meetings will depend on the needs of the community and the specific activities occurring at the Site.

5.2 Keeping the Public Informed

The EPA will perform the following key activities in order to ensure that the community is kept informed of the current and planned activities for the Site.

5.2.1 Designation of EPA Officials

The EPA has designated a Remedial Project Manager (RPM) for the Site. The RPM is the official designated to coordinate, monitor, and direct all remedial or other environmental response actions at the Site. Technical and nontechnical questions about the Remedial Investigation and Feasibility Study should be directed to the RPM. The RPM for the Site is Rafael Abrego Casanova, P.G. (Environmental Scientist). Contact information for all of the EPA's officials can be found in Appendix A (EPA Regional Contacts).

The EPA has designated an On-Scene Coordinator (OSC) for the Site. The OSC is the official designated to coordinate, monitor, and direct all removal response actions at the Site. Technical and nontechnical questions about the removal action should be directed to the OSC. The OSC for the Site is Gary Moore.

The EPA has designated a Community Involvement Coordinator (CIC) for the Site. The CIC is responsible for Site inquiries about community involvement and non-technical community issues. These questions should be directed to the CIC. The CIC for the Site is Phyllis June Hoey.

5.2.2 Fact Sheets, Technical Summaries, and Presentations

The EPA will prepare and distribute fact sheets and technical summaries to provide citizens with current information about the Site. These fact sheets and summaries will be mailed to all parties included in the Site's mailing list. Copies of these documents will be placed at the Site's information repository. The EPA will also place public notices in local newspapers to inform the community of any planned community meetings. The EPA will utilize formal/informal presentations to disseminate information about the Site.

5.2.3 Toll-Free Telephone Number

The EPA has provided a toll-free telephone number to enable citizens to obtain the most current information about the Site, without incurring any cost. This number is 1-800-533-3508. The EPA will publish this number periodically in local papers and in all fact sheets.

5.2.4 Mailing List

The EPA will maintain a mailing list to facilitate the distribution of Site-specific information to everyone who needs or wants to be kept informed about the Site. This list may include all residences adjacent to the Site. The EPA will solicit interested parties through community interviews, fact sheets, newspaper articles, and public meetings. This mailing list will be kept current. Other entities that may be included in the mailing list are included in Appendices B (Local Officials), C (State Officials), D (Federal Elected Officials), E (Environmental and Active Citizens Groups), and F (Media Contacts).

5.2.5 Information Repositories

The EPA will maintain Information Repositories (see Appendix G - Information Repositories) to provide a convenient location where residents may read and copy official documents and other pertinent information about the Site and the EPA's activities. A repository is a reference collection of Site information that can contain the Administrative Record file, Site-specific information, the Community Involvement Plan, information about the Technical Assistance Grant program, and the general Superfund process. The CIC will coordinate with a local contact to maintain the local repository. This repository will be accessible to the physically challenged, will have copier facilities, and will be available to residents during normal business hours and possibly some evening and/or weekend hours. An additional repository will be maintained at the EPA Region 6 offices in Dallas, Texas.

The EPA established a local repository on September 9, 2002, at:

Ingleside Public Library
2775 Waco Street, P.O. Drawer 400
Ingleside, Texas 78361

5.2.6 Site Information on the Internet

The EPA has placed information about this Site and the Superfund program on the internet. These sites provide key resources for searching and listing both general and specific information about Superfund and hazardous waste issues. The Proposed Plan and the Record of Decision for the Site will be placed on the internet as they are completed. These internet sites will be updated periodically. Following are the internet sites containing information about the EPA and the Site:

- a. Falcon Site Status Summary - <http://www.epa.gov/earth1r6/6sf/6sf-tx.htm>
- b. EPA Headquarters - <http://www.epa.gov>
- c. EPA Region 6 - <http://www.epa.gov/earth1r6>
- d. EPA Region 6 Superfund Division - <http://www.epa.gov/earth1r6/6sf/6sf.htm>

5.2.7 Technical Assistance Grant

The purpose of a Technical Assistance Grant (TAG) is to provide monetary resources for community groups to hire a technical advisor who can assist them in interpreting technical information about a site. The EPA will provide information about the TAG program at public meetings and in Site fact sheets. The EPA will also provide briefing sessions to interested groups if requested. The EPA will provide TAG applications to qualified groups, and will provide assistance to the group in completing the application.

5.2.8 Administrative Record

The EPA will establish and maintain the Administrative Record (AR) for the Site. The purpose of the AR is to provide residents with a paper trail of all documents, resources, etc., used by the RPM and the Site Team in reaching all decisions about the Site and its final remedial action and cleanup. The EPA will provide at least two sets of the AR for the Site, one in the EPA Region 6 offices and another located at the local Information Repository near the Site.

5.3 Opportunities for Public Involvement

The EPA will perform the following key activities in order to provide adequate and meaningful opportunities for community involvement.

5.3.1 Special Events

The EPA will host community meetings to update the community on Site developments and to address the community's questions, concerns, and comments. The EPA will schedule, prepare for, and attend all announced meetings. The EPA will provide adequate notice of the scheduled meetings. The RPM, OSC, CIC, other appropriate EPA staff, and the PRP will attend these meetings. A public meeting is required during the Proposed Plan comment period if requested by the public. The EPA will hold other public meetings as appropriate.

5.3.2 Community Advisory Group

The EPA will encourage the community members to form a Community Advisory Group (CAG) to provide citizens with a meaningful way to become actively involved. The EPA will provide support as appropriate to facilitate its formation. If formed, the EPA will provide administrative support but will not be an active member. The EPA will respond to any requests for assistance in the formation of a CAG.

5.3.3 Informal Community Visits

The EPA will make informal visits to the community to help keep community members informed about the Site, while providing the EPA with feedback about Site activities and the community's opinions.

5.3.4 Solicitation of Comments

The EPA will solicit comments during a public comment period to give community members an opportunity to review and comment on various EPA documents, especially the Proposed Plan. This provides the citizens with meaningful involvement in the process and also provides the Site Team with valuable information for use in making decisions about the Site. The EPA will announce each comment period separately. Announcements will appear in local newspapers and EPA fact sheets. A comment period is required in conjunction with the announcement of the Proposed Plan and will last a minimum of 30 days.

5.3.5 Responsiveness Summary

The EPA will prepare and issue a Responsiveness Summary that summarizes comments received during public comment periods. This summary documents how the EPA has considered those comments during the decision-making process, and to provide responses to major comments. The EPA will prepare a Responsiveness Summary as a section of the Record of Decision. All of the information in the summary, both technical and nontechnical, will be conveyed in a manner that is easily understood by the community.

5.3.6 Revision of the Community Involvement Plan

The EPA will revise the CIP to identify and address community needs, issues, or concerns regarding the Site or the cleanup remedy that are not currently addressed in this CIP. The EPA will revise the CIP as community concern and Site activities warrant.

Table 1
Time Frame for Community Involvement Activities

Activity	Time Frame
Designate an EPA RPM, OSC, and CIC.	Done.
Prepare and distribute site fact sheets and technical summaries.	Ongoing.
Provide a toll-free telephone number for the community to be able to contact the EPA.	Done.
Maintain a mailing list for the Site.	Ongoing.
Establish and maintain Information Repositories.	Done, update as needed.
Provide Site and Superfund information on the Internet.	Done, update as needed.
Provide Technical Assistance Grant (TAG) information.	Coastal Bend Bays Foundation has applied for the TAG.
Establish and maintain the Administrative Record.	Update as needed.
Conduct special events.	Conduct as needed.
Hold community meetings.	Conduct as needed.
Encourage formation of a Community Advisory Group (CAG).	Ongoing.
Make informal visits to community.	Conduct as needed.
Solicit comments during a Public Comment Period.	Solicit as needed and required.
Prepare and issue a Responsiveness Summary.	Following public comment periods.
Revise the Community Involvement Plan (CIP).	Revise as needed.
